

License Name	Type	Short Description
No License	None	Code is fully copyrighted. Others cannot use, modify, or distribute it without permission.
Apache License 2.0	Permissive	Allows use, modification, and distribution. Includes patent protection and requires license & notice.
MIT License	Permissive	Very simple and flexible. Allows almost anything with attribution. No warranty.
BSD 2-Clause "Simplified" License	Permissive	Similar to MIT. Allows reuse with copyright notice. No endorsement clause.
BSD 3-Clause "New" or "Revised" License	Permissive	Same as BSD 2-Clause but forbids using author names for promotion.
Boost Software License 1.0	Permissive	Allows free use and modification. Common in C++ projects. Minimal restrictions.
Creative Commons Zero v1.0 (CC0)	Public Domain	Waives all rights. Code can be used without any restrictions or attribution.
Eclipse Public License 2.0	Weak Copyleft	Modifications must be shared under the same license, but allows linking with proprietary code.
GNU General Public License v2.0 (GPL v2)	Strong Copyleft	Any distributed modifications must also be open-source under GPL v2.
GNU General Public License v3.0 (GPL v3)	Strong Copyleft	Like GPL v2, plus protection against patent claims and "tivoization".
GNU Affero General Public License v3.0 (AGPL v3)	Strong Copyleft	Like GPL v3, but also requires sharing source code for web/network use.
GNU Lesser General Public License v2.1 (LGPL v2.1)	Weak Copyleft	Allows linking with proprietary software; modifications to library must be open.
Mozilla Public License 2.0 (MPL 2.0)	Weak Copyleft	File-level copyleft. Modified files must be open-source, others can remain closed.
The Unlicense	Public Domain	Places code into the public domain. No restrictions at all.

License	Commercial Use	Modify	Distribute	Patent Grant	Must Disclose Source	Attribution Required	Best Used For
No License	✗ No	✗ No	✗ No	✗ No	✗ No	✗ No	Private or personal code only
